EXPERIENCE

March '24

Present

Allegro | Warsaw, Poland

User Interface Designer

- Improved the experience of internal tools by refining design libraries and overhauling documentation
- Drove usability improvements by collaborating with design teams on identifying pain points and gaps in design system operations.
- Advocated for proper design system adoption across teams through consulting, and hosting feedback sessions

June '21

March '24

Virgin Pulse | Remote

User Experience Designer II

- Design System Lead for mobile, and web app component libraries built in Angular framework
- Established documentation, guidelines, standards and best practices for design operations across the organization
- Facilitated several workshops, and educational sessions around Design System ops
- Successfully improved adoption of components and standards across multiple teams

August '19 to

August '20

BMW Technology | Chicago, IL

Interaction Design Internship

- Worked as the lead designer on a version control application aimed to improve collaboration between designers and developers
- Created and established design system guidelines including imagery, animation, as well as general component usage for the global design team
- Worked as production designer maintaining BMW/MINI UI library components distributed to the global design team
- Produced animated and static prototypes demonstrating motion and interaction flows, for both design and development
